

DJ DANÇ

About:

DJ Danç started mixing in early 2008. Driven by a passion to play the dance music he was creating live to people in night clubs.

Like the name implies DJ Danç specializes in the mixing and production of dance music. Whether that be chilled out Progressive House to the more popular Hard Trance and Hard Dance. With a multitude of styles in between.

Danç's unique style and sound come mixing all things dance music related. Not just focusing on one particular style has allowed a fusion of mixing techniques based heavily in looping, track layering and manual effect manipulation. His biggest influences have come from DJ's such as Eric Prydz, Dave Aude, Amber Savage, DJ Tiesto and Armen Van Buren.

Currently Danç is working on staging dance music events in Newcastle and more rural areas of New South Wales under the name More Dance Music Australia. Teaming up with resident DJ's of Sublime (Australia's #1 Club night 4 years running) they are hoping to have a regular event established for the beginning of summer 2009.
